

ABOUT US

SPITZ VET CARE

OUR COMPANY

PHILOSOPHY

Our passion and targets are good and intelligent products “made in Germany” as our contribution for an outstanding care for our animals.

**PASSION FOR
OUR ANIMALS**

“

We have a strong commitment to our company philosophy and believe in our core value which are essential pillars of our future strategy”

– Natalie Paul

DEDICATION TO ANIMAL HEALTH

Animals deserve dedicated medical devices and high quality treatment.

COMMITMENT TO SUSTAINABILITY

Sustainability means commitment to our home region with a short pathway from the raw material to the finished good. Tuttlingen and SPiTZ have grown based on outstanding craftsmanship for surgical instruments and endoscopic devices.

We believe in products with a long lifetime in surgery which creates connectivity to the surgeon.

INNOVATIVE PRODUCTS

Innovation is not just a new product. Innovations should provide a solution to make things easier. Innovation should be driven by the user and the person who uses or maintain the product. We stay in constant dialog with our partners around the globe and listen to their needs.

ENVIRONMENTALLY FRIENDLY

As part of our environment we see our responsibility for our community as well as for our global footprint. Reusable products, economical building, a critical look into our processes and a personal commitment from each single person will help to keep SPiTZ as green as possible.

SOCIAL RESPONSIBILITY

Our corporate social responsibility is very important for us. SPiTZ has established a family friendly working culture and every employee is important for us. We take responsibilities in our community and support social activities and youth sport groups in our region.

OUR PRODUCTS

MORE
THAN
15.000
PRODUCTS

We sale more than 15.000
products in different product
groups.

DIAGNOSTIC ENDOSCOPY AND DEVICES

Instruments, scopes and special systems for the treatment and diagnosis in natural openings of the body - starting from Otoscopy till Cystoscopy.

LAPAROSCOPY

Full HD or 4K imaging, instruments for the minimal invasive approach and the treatment of intraabdominal pathologies and all accessories makes our product program complete.

ARTHROSCOPY

Visualization, presentation and documentations is crucial for the right diagnosis and the precise and nice instruments as necessary for the good treatment. We know the challenge of the arthroscopy for joints in different sizes for different species and provide instruments, scopes and devices for all joints.

OPEN SURGERY

9500 different pattern all Made in Germany will provide the surgeon to tools he needs. Our catalogue with 1200 pages is a comprehensive book of standard surgery instruments and combines all open surgery indications.

THE PROCESS

HOW DO WE WORK

CHALLENGES OF THE VETERINARIANS

We take the challenge and listen to the veterinarians, the technical and nursing staff as well as to the needs of the AEMP department to provide a better product.

CONSTRUCTION BASED ON REAL NEEDS

Short decision ways and high flexibility keeps the project plan short. QM and RA are part of each development from the early stage of the idea to guarantee the conformity in all project stages.

THE STORY OF THE PRODUCT

The story of our products tells the story of our core values. Sustainability, the focus on real innovations, the commitment to our area and the flexibility of our processes keeps our focus on each single project and product.

HIGH-END MANUFACTURING

We use our highend technological infrastructure and the network in our home area to keep our production quality on a high level and to be a sustainably partner in the complete supply chain of the product.

SKILLED CRAFTMANSHIP

Each product goes multiple times through the hands of skilled surgical device mechanics and the products just pass our quality control after single piece control by different skilled persons.

PERFECT FINISH

Just after passing our quality control, the instrument gets the final touch and will be marked with all necessary documentation.

“

**I like the perfect cut of our scissors
and the sound of a good neede holder”**

– Thorsten Bezikofer
